

UK'S BEST

DEVELOPERS • AGENTS • DESIGN • INTERIORS

Interior Design Services operates from the heart of Belgravia, a prestigious London address that speaks volumes about the elegance and style clients can expect from the company. Founder Vanessa Brady has 25 years experience in the interior design business, offering a vast amount of expertise for clients to draw on when they commission their uniquely personalised living spaces. IDS's design ethic can be summed up in three succinct phrases – chic, understated and classically stylish – and it's their mission to fulfil this brief on time and on budget while demonstrating the highest standards of care and craftsmanship. The firm is a member of several industry bodies, including the Federation of Master Builders, the Institute of Residential Property Management and the International Interior Design Association, all testimony to its stellar reputation. Projects currently underway

include a Royal household, a 10,500 square foot residential home and an apartment within a Grade II Listed building.

Interior Design Services is synonymous with strong design and careful management. As Vanessa points out, "We're not the only design or installation team but we do turn away more work than we accept. We have steady growth due to our ability to adapt and select the projects that align with the image of the company. It's our aim to bring simplicity to every project, reducing downtime and therefore reducing costs. We listen carefully to client's opinions and requests and then our creativity steps in to complement the original ideas and ensure that each project truly excels."

For Interior Design Services every design job is unique and there is no such thing as a typical project. There are, however, certain qualities

that clients have come to associate with the firm, with characteristic use of innovative planning and colour specifications ensuring that, however large or small the space, there's always a sense of increased volume and a general atmosphere of calm. The firm gives a comprehensive 'top to bottom' service, providing all the tools and expertise a property owner needs to create their dream home interior, starting from the basics of room planning and layouts – and

dealing with the consequent problems of planning consent – and taking in bespoke construction, plumbing and electrical installation. IDS staff will also arrange furniture supply and carry out extensive budgeting and cost planning.

Above all else, client satisfaction is critical to Interior Design Services. Whether the property is a large contract project or a luxurious residential home, the company aims to deliver a haven on peace and tranquillity to its clients.
